MY LABS

With My Labs, you can view your recent laboratory test results on one simple page. You can also download PDF copies of all of your lab results to share with your healthcare provider.

TRENDS

Trends enable you to track changes in your test results over time and identify tests that have improved, gone out of range or results you may want to monitor.

GET SMART

Here you'll be able to *Get Smart* on all your lab tests. Simply select a health category to learn more about why your doctor wanted this vital health information and what external factors might affect the test (such as medications or supplements). You can also explore external resources and watch educational videos.
